Catalogue Use & Guidelines

Digital Integration

An informed procurement decision is reliant upon having comprehensive and appropriate information relating to the product in question. While trying to showcase as many products as possible in this edition of our catalogue, print media is inherently restrictive in terms of the amount of information we can publish for each item. The introduction of the Advanced Office section to our catalogue, now offers products that are more technical in nature, requiring more information and specifications to ensure a truly informed decision.

At the bottom left of each page in the catalogue, we offer a direct link to a web page containing additional information to that which is represented in the catalogue. Supplementary information and content is available in these web pages in the form of a knowledge base that deals with the individual application need.

Warranties

We extend all the inherent warranties on all products available from the manufacturers to our clients as a matter of course. These warranties, and the content thereof, are carried directly by the manufacturer, and we ask that you consult the individual brand page in each case for more detail in terms of the content of these warranties. Logos are displayed for content purposes and remain the propery of the respective brand owners.

Locally Manufactured

Look for the "Manufactured in South Africa" icon to identify locally manufactured products within the catalogue

Product & Stock Availability

While every effort has been made to ensure the product availability at the time of print, and for the duration of this catalogue, by nature certain products are replaced and upgraded at a higher frequency than other products, especially those of a technical nature. Once again, we ask that you consult the relevant web pages for information on current ranges.

Visual Representation

In certain circumstances product images are displayed with contents therein. This is done so merely to illustrate the product's application and unless expressly stated these accessories are not included in the sale of the product.
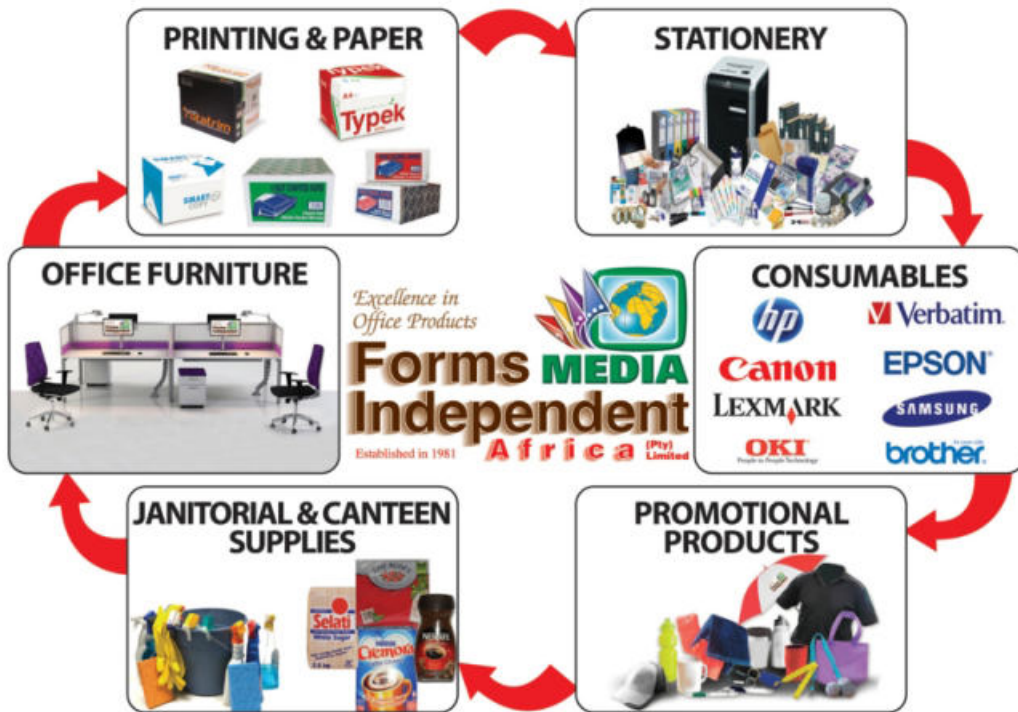

Units of Sale

All products are sold as single items, unless stated otherwise. For your convenience, pack sizes are also listed for your stocking convenience.

Delivery

We offer delivery at no charge to all of our account holders within a 80km radius of any of our branches. Delivery outside this area can be negotiated.

DYMO® LabelWriter™ Labels

DYMO® LabelWriter™ Labels use a direct thermal printing process – so you never need to bother with messy, expensive ink or toner cartridges. And because they're packaged in rolls, you can print one label or hundreds with ease – no sheet label jams, no layout hassle and no waste.

Label Types:

- Permanent white paper labels: Ideal for most labelling jobs
- Removable white paper labels: For non-permanent labelling – leave no residue when removed
- Permanent transparent plastic labels: Allow the surface being labelled to show through – give the appearance of printing directly onto the surface
- Non-Adhesive cards: Appointment cards or name badges for usage in combination with badge holders or badge clips

Glossary of Terms

Banker
The banker envelope has a triangular flap on the long edge. Traditionally used in the greeting card industry, for business use, letter paper and cards.

Pocket
With pocket envelopes, the opening flap is positioned on the short edge.

Gummed
The common envelope sealing method is water soluble gum. The layer of adhesive along the envelope flap is moistened and closed.

Self Seal
A strip of latex on each flap and is pressed together to form an instant bond.

Strip Seal
One of the most secure ways to seal an envelope is strip seal; peel away the release tape from the flap to reveal a strip of latex and press down to form an instant bond.

One Business
The superroller

▷ 0.6 mm

The One Business is a new ink rollerball with the new Super-Flow system for uniform ink flow right down to the last drop, and an incredibly smooth writing experience. The classically understated silhouette of this writing instrument with its high-quality metal clip is reminiscent of the original shape of the fountain pen. Generously incorporated surfaces of transparent hard plastic act like windows, revealing the ink level down the barrel. The first Ultra-Smooth tip ever to be used imbues the inkroller with an optimum writing feel. The ink colours are accurate matches with ISO 14145-2. Line width 0.6 mm.

Mondi Rotatrim Paper

Mondi Rotatrim, the Better Performance Paper runs smoothly, free of dust and ridges, with better toner transfer through all office machines, photocopiers, laser and inkjet printers.

Mondi Rotatrim has a high whiteness rating of 160CIE*, which ensures greater print clarity, good contrast and aesthetic appeal. Through the utilisation of Eucalyptus pulp as a fibre source, excellent bulk and opacity characteristics are attained, resulting in excellent runnability and a sheet perfectly suited for double sided printing.

Mondi Rotatrim is part of the Green Range and has FSCR certification. The Forest Stewardship Council (FSCR) is the accepted leader in forest and timber product certification and has established standards for environmentally, economically and socially responsible forestry.

- High Whiteness
- High Opacity
- Excellent Bulk
- Uncoated for Optimum Toner Usage
- Smooth Surface for Excellent Runnability
- Outstanding Texture

Typek Multi-Purpose White Paper

Typek is a locally produced office product favoured by businesses, retailers and stationers for its quality and distinctive red packaging. Typek is unique in that it is manufactured from waste sugar cane fibre with the remaining fibre coming from well managed and sustainable plantations.

Typek also carries the Earth Kind™ label which is a visible, simple and relevant icon that captures the essence of Sappi's and Typek brand's approach to sustainability and corporate citizenship. The Earth Kind symbol is a heart symbolising humanity, placed inside an orb shape that depicts the earth, encompassing nature and the people who inhabit it.

A combination of superior smoothness, good ink adhesion and colour reflection makes it the best choice for professional looking documents and is suitable for use in multiple office copiers and laser printers. More businesses use Typek.

AUTOFEED — Auto Feed Features

Stack, Shut, Done!
Simply load up to 750 sheets, shut the lid and walk away. The powerful cutters also shred paper clips, staples, credit cards and CDs/DVDs.

Stack

Mercury™ Jam Free Technology
Mercury™ manual feed slot conveniently prevents jams with a clear visual indicator when too many sheets are inserted.

Manual Feed
Ultra convenient manual feed slot for small jobs of up to 12 sheets.

Shut

Security
A 4-digit PIN code lockable chamber. Leave the shredder to do its job with peace of mind your documents are safe.

Intelligent™ Features
Easily maintained with intelligent "Self Oil" and "Self Cleaning". The eco-friendly power save features maximise the performance and life of the shredder.

Done

Large Capacity
Less bin emptying with a waste bin of up to 115 litre capacity that holds up to 1,350 shredded sheets. A helpful bin full indicator lets you know when the shredder needs to be emptied.

POLYTEC®: CASEMADE WITH YOUR PRINTED GRAPHICS

**Introducing Bantex X-Press, Polytec® and branded packaging solutions.
Branding opportunities for a lasting corporate message.**

Nothing expresses a brand quite like a specially designed and co-ordinated range of stationery. With Bantex, you design it, we make it. Choose from a range of quality products and specialised production techniques to create the ultimate professional image.

The Bantex Polytec® process affords you the very best finishes, combining polypropylene lamination with embossing. Add your own graphics. Choose your feature accessories. Specify your preferred dimensions. The ultimate creative solution will provide that truly professional presentation.
